

## Safe, High-quality Services for Unsheltered Adults

The former RV dealership at 333 S.E.  
82nd Ave. will be converted into a  
safe park village.

Dear neighbors,

The Joint Office of Homeless Services would like to share an update on plans to help unsheltered adults in East Portland find safety off the streets on their path to housing.

The Joint Office is converting the property at 333 S.E. 82nd Ave. into a provider-managed, reservation-based safe park site. The site will provide people who live in their vehicles a safe place to park, as well as access to housing services and supports. The site will only serve people living in passenger vehicles, not RVs.

The Joint Office is developing a contract with nonprofit provider Straightway Services to manage the site. **Access to the site will be available by reservation only.** Facilities on-site will include restrooms, showers, a kitchenette, offices and common spaces.

The Joint Office has opened 17 shelters in the community since 2020, including alternative shelters like Beacon Village.

For the latest on the safe park site, visit
